Short Description
Fire Deck Wood Stone Pizza Oven Model WS-FD-9660-RFG-LR-IR-DF-NG

Description
Fire Deck 9660 Product Details:

From Wood Stone's most powerful line comes the Fire Deck 9660. Available with radiant gas flames, wood-fired, or a combination, the Fire Deck 9660 is equipped with an underfloor infrared burner to maintain temperature under the pressure of even the heaviest production cycles. The 54-inch wide doorway and rectangular, 22-square-foot cooking surface make operation and rotation simple. The Fire Deck 9660 has a theatrical visual appeal, with spectacular views of the live fire in the chamber and a familiar, classically American aesthetic. Built in the USA to last, the Fire Deck 9660 arrives fully assembled and ready to install. Favored by leaders in the emerging QSR pizza scene, the Fire Deck 9660 has the muscle and consistency required by ultra-high volume restaurants – the Fire Deck 9660 is a serious workhorse.

The Forklifts at our Warehouse are rated at 5,000 lbs so in the event that a larger forklift must be rented, Buyer is responsible!
